## Centra purge gas pipe clamps

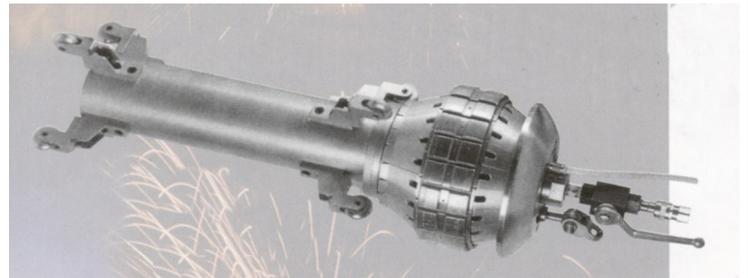

### Manual pipe clamps

Stainless steel clamps for centering clamps. The purge gas can be supplied through the clamping head. The clamp is also usable for only clamping, then it will be executed in carbon steel.

Deliverable for internal diameters from 34 till 374 mm.

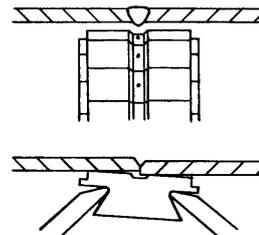

### Hydraulic pipe clamps

Stainless steel clamps for centering pipes. Clamping goes through a hydraulic foot pump. The clamp is also usable for only clamping, then it will be executed in carbon steel. Deliverable for internal diameters from 102 till 804 mm.

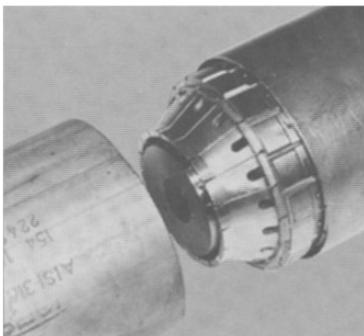

### Aerospace pipe clamps

The aerospace pipe clamps are hydraulic operated pipe clamps, suitable for thinwalled pipes especially used in the aviation.

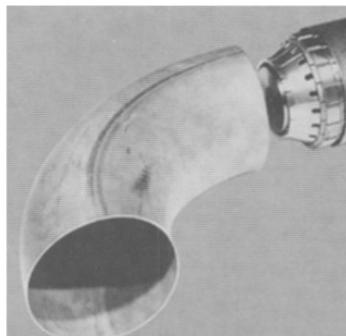

The conical fingers operate independently from each other, by this pipes are always clamped "in line".

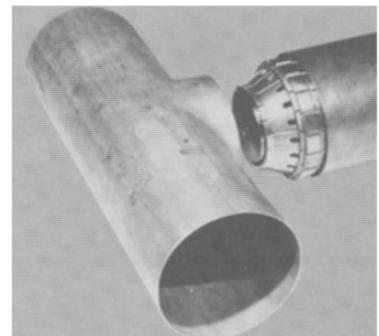

### Applications

Pipe, pipe-connection

Pipe, bend - connection

Pipe - T joint connection
