Centromat external centering tools

The CENTROMAT external centering tools are ideal tools for clamping and centering pipe/pipe connections. If there is a difference in pipe diameters and these diameters are within the minimum and maximum range of our equipment, the differences are evenly divided over the circumference so that the center lines are always in one straight line.

The Centromat external centering tools are deliverable in three measure ranges :

Type	Min. O.D.	Max. O.D.	Weight
M	10 mm.	70 mm.	3 kg.
N	40 mm.	140 mm.	6 kg.
P	75 mm.	330 mm.	22 kg.
