

Nitty Gritty printers for marking.

24mm standalone version

100mm USB version

The Nitty Gritty printers are made to be able to "print" one-off templates for marking.

The 24mm version is a standalone, it contains a cartridge with tape, the printer is transportable. (cartridge contains 3 meters).

In the 100mm USB version comes a roll with tape, this printer remains connected with a computer. (roll contains 50 meters).

With the supplied software you can easily create the desired texts, symbols or logos.

If you regularly need the same templates, it is possible to have plastic templates made at Nitty Gritty, which you can easily clean with water after use and then you can use it again.
