H&M

Pipe cutting and beveling machine

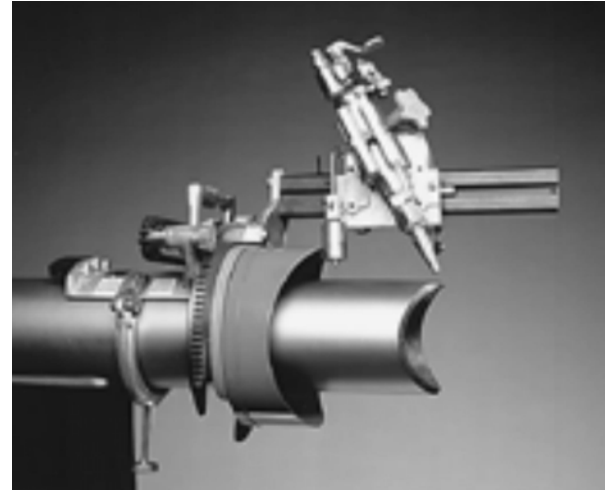

Cutting range 2 to 36"

The RING GEAR SYSTEM allows precise back-beveling operations without sacrificing the machine's integrity .
After this the grinding operations are MINIMAL.

The H & M Pipe cutting and beveling machines can be executed with an electric drive.

A special torch holder and templates for cutting special forms are available.

ADVANTAGES:

- quick mounting on the pipe.
- cutting and beveling in 1 operation.
- flame cutting with minimal after operation.
- torch holder is versatile adjustable.
- torch/pipe distance always the same with a special torch holder (option for out of round pipes).

Cutting ranges H&M cutting and beveling machines
